Target version:		Spent time:	0.00 hour
Description			
check some file names and see.			

History

#1 - 09/17/2018 09:14 PM - Steven Timm

Actually the stuff is in /eos/experiment/neutplatform/protodune/np04tier0/daq/data

goes from run zero to 381

Answer--runs 300-381 with gaps are there, runs 0-299 are not.
Should transfer it and then get rid of it.

#2 - 09/17/2018 09:15 PM - Steven Timm

2.1TB total stuff

will have to mock up json files and transfer it.

#3 - 09/17/2018 09:18 PM - Steven Timm

also there's an np04tier0/daq/bnl_ce directory which have the data for APA1 but not the rest of the stuff I am working on now.

#4 - 09/20/2018 08:00 PM - Steven Timm

- *Subject changed from The old stuff in scratchdisk/daq/data is it all on tape? to Get the stuff in np04tier0/daq/data on tape*

A lot of it isn't on tape, anything run 300 or below.
