| If a return is selected for offsite pickup, dispatch needs to know where at Fermi to pick them up for the return. Add more columns to that table, put return on the right side, with return check box, return date/time and a pick list of fermi buildings to choose from what building at that time to return. |             |                        |            |
