<b>Description</b>			
MicroBooNE requests the first MCC9 patch release to be branched off larsoft v08_00_00.			
This patch release should be built by merging the following packages/branches into the newly created mcc9 branches.			
larsim feature/davidc_mcrevalidation larevt feature/herogers_voxelizedSCE			
I believe that David C. has already requested that the above larsim branch be merged into develop for this week's integration release. That request and this request are separate. David's request should be considered according to the usual larsoft procedures.			
This patch release will be used for the base of a uboonecode patch release using uboone suite branches v08_00_00_br.
