Description

See INC000001024153. The error message returned to the user is something along the lines of 'condor_rm cant find the address of schedd jobsub01.fnal.gov'. The developers and most 'old hands' know this to be a symptom of the schedd being too busy to reply to jobsub commands, but it is not helpful at all to someone who has never seen the behavior before.

Intercept this error, report something more helpful and suggest a workaround.

History

#1 - 05/17/2019 02:57 PM - Dennis Box

- Target version changed from v1.3 to v1.3.1

#2 - 01/09/2020 02:57 PM - Dennis Box
