Description			
From Igor			
Hi all.			
While trying to fetch the logs from a glidein, I noticed it is far from easy; the security handshake is failing due to my client not trusting the glidein			
The problem is that frontend/group_whatever/group.mapfile does not include all the glidein DNs.			
The frontend daemons indeed do not need them, but an admin may when doing debugging/maintenance tasks.			
Can we add an additional mapfile, maybe frontend/group_whatever/admin.mapfile that includes also the glidein DNs?			
Thanks, Igor
