#### Description

Steve Timm noticed problems when using entry names like:  
"FNAL\_HEPCLOUD\_AWS\_us-east-1a\_m3.2xlarge", including a dot.

They "have seen some stuff that was unhappy because of this".

The goal of this ticket is to:

- verify what is the problem and why
- solve it if it is easy (to allow dots in the names)
- otherwise document that entry names cannot include dots (list the valid characters for entry names)

#### History

**#1 - 05/01/2019 05:34 PM - Marco Mambelli**
