Description

We'd like to have an API to list the campaign stage submissions for a given campaign. The web page shown as below:

https://poms-int.fnal.gov/poms/campaign_stage_submissions?campaign_name=test_yuyi_2_prod_muminus_0-2.0TeV_isotropic_uboo ne&stage_name=* &campaign_id=3286&tdays=7&tmax=

So on the server side, you can just add

```
&format=json
```

to that url now and get the json dump.
