#### Description

and/or gallery-fmwk-config includes

This is at least true in gallery v1\_11\_02.

I think it should be included: we have some previously written code that includes makes this config --includes calls inside make files, but then compilation fails due to not finding hep\_concurrency/tsan.h in canvas/Utilities/DebugMacros.h

Thanks!

Wes, *gallery* is not shipped with a gallery-config command. Where are you getting it from?

##### #2 - 03/13/2019 02:54 AM - Wesley Ketchum

Ha, that answers that ...

Sorry, I thought this was coming from a gallery utility/function, but turns out it was part of some setup scripts and helper functions defined in our own code.

Please feel free to close this. Very sorry for the trouble.
