

Fermi Redmine - Support #22153

Repositories aren't updating

03/18/2019 12:07 PM - Richard Neswold

Status:	New	Start date:	03/18/2019
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>I tried creating two repositories last Friday and they still haven't been created by Monday morning. They're located in the "AD Controls Department" project.</p> <p>This morning I pushed some commits to the repository in the "scripts" repository of the "acsys-fe" project. It usually takes 15 to 20 minutes before showing up but my repo shows "about 1 hour" for the age of the commits and the history hasn't been updated (which means I can't refer to the commit hash in the issue I'm trying to close out.)</p> <p>Whatever task updates the repositories seems to be broken.</p>			

History

#1 - 03/18/2019 01:07 PM - Richard Neswold

I came across [#13608](#) and have ran the **ssh** command recommended by Marc. I'll post whether this fixed the problem.

#2 - 03/18/2019 01:12 PM - Richard Neswold

The command

```
$ ssh p-acsys-fe@cdcvs.fnal.gov echo hi
```

logs in and runs the **echo** command. Hopefully that will trigger the script to update the history. On the other hand, the command

```
$ ssh p-ad-controls-dept@cdcvs.fnal.gov echo hi
```

returns "Permission denied (publickey,gssapi-keyex,gssapi-with-mic)." I don't think that account will exist until the first repo is created, so I can't try the workaround.

#3 - 03/18/2019 01:44 PM - Marc Mengel

Sure enough, when I check the logs for said script:

```
Fecthing changesets for uboone-operations
--2019-03-18 13:20:03-- https://cdcvs.fnal.gov/redmine/sys/fetch_changesets?id=
uboone-operations&key=(redacted)
Resolving cdcvs.fnal.gov... 131.225.108.132:443... connected.
ERROR: cannot verify cdcvs.fnal.gov's certificate, issued by "/C=US/O=DigiCert I
nc/OU=www.digicert.com/CN=DigiCert SHA2 High Assurance Server CA":
Unable to locally verify the issuer's authority.
```

Looks like our local certificate store doesn't have the latest DigiCert certs...

sigh.

Re-running them now for the last 4 days worth, and looking to see what else might be tripping up like this...

#4 - 03/26/2019 08:42 AM - Richard Neswold

Running your scripts updated the repos mentioned in the issue. However, another repo hasn't updated in 12 hours. Can you run your scripts again?

#5 - 03/26/2019 08:50 AM - Richard Neswold

Nevermind. User error this time. I pushed to a branch but was viewing master. Sorry for the noise.
