

dunetpc - Bug #22416

Segfault when accessing ParticleList

04/19/2019 12:16 PM - Daniel Pershey

Status:	Closed	Start date:	04/19/2019
Priority:	Normal	Due date:	
Assignee:	Jason Stock	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Between dunetpc versions 08_07_00 and 08_14_01, trying to access ParticleList() from our ParticleInventoryService. The segfault also seems to get thrown on any call to a method of ParticleInventoryService. I also get a segfault when using the more fundamental methods like ParticleInventoryService::TrackIdToParticle_P(int) for any particles in the event.

Thanks Dan. Can you also add the file you were running on and the analyzer you were using (all the details from slack).

#2 - 05/10/2019 10:59 PM - Jason Stock

Hey Dan,

Do you still have the information for this? It has fallen onto the back burner waiting for more details.

- Status changed from New to Closed

I suppose the old problem is resolved.
