Subject: Permission to remove minospro crontab on minos61

Minos near detector data taking finished on May 3, 2019.

We continue to get email messages from the minospro jobs running via cron on minos61.

I suggest removing the crontab entries for minospro on minos61. These entries all seem to have to do with running keepup.

Any objections ?

No objections from my side.

Thank you for following up with it. Let me know if any action from the MINERvA side is needed.

Best,
Mateus
