Target version:		Spent time:	0.00 hour
Scope:	Internal	SSI Package:	
Experiment:	-		

Description

NOvA and LArSoft would benefit from on demand loading of module libraries, especially as it appears to be an easy change to the ART code. There is no rush on getting this done before the first of the year. It can either go into a release by itself or with other fixes that may come up between now and then.

History

#1 - 12/16/2011 11:58 AM - Christopher Green

- Status changed from New to Rejected

Upon further investigation, it is apparent that this feature is already in place for modules.
