

## Production Operations Management Service (POMS) - Bug #23051

### POMS client API upload\_wf to create a POMS Campaign on POMS dev instance, doesn't work

08/02/2019 03:59 PM - Vito Di Benedetto

**Description**

On POMS dev instance when I use POMS client API upload\_wf to create a POMS Campaign I get the following error message:

```
Traceback (most recent call last):
  File "/uboone/app/users/vito/project.py/converter/project-py/bin/Project.py", line 323, in <module>
    replace=args.replace_campaign)
  File "/uboone/app/users/vito/project.py/converter/poms/poms_client/python/poms_client.py", line 131, in upload_wf
    replace=replace
  File "/uboone/app/users/vito/project.py/converter/poms/poms_client/python/poms_client.py", line 734, in make_poms_call
    raise RuntimeError("POMS call %s error: HTTP status: %d\n%s" % (method, status_code, res))
RuntimeError: POMS call ini_to_campaign error: HTTP status: 400
```

It looks like something is changed in **ini\_to\_campaign** for poms\_client develop branch.

I also tried to upload the .ini file from the POMS Campaign dashboard, in this case I don't get any error message, but the POMS Campaign is not created as well.

## History

### #1 - 08/05/2019 10:03 AM - Marc Mengel

I've been adding the output\_ancestor\_depth support to the CampaignStage, it was now expecting that field; I think it should default it to "1" now.

### #2 - 08/05/2019 11:01 AM - Marc Mengel

Hmm.. in testing I'm finding more goofups though... still looking...

### #3 - 08/05/2019 11:28 AM - Marc Mengel

Okay, so I think the upload should be working again...

### #4 - 08/05/2019 11:38 AM - Vito Di Benedetto

I'm still getting some issue.

I updated poms\_client to current develop branch.

If I try to create the POMS Campaign from POMS dashboard I get:

```
401 Unauthorized
PermissionError('Must be user None to change this',)
[...]
```

if I try through poms\_client I get

```
Traceback (most recent call last):
  File "/uboone/app/users/vito/project.py/converter/project-py/bin/Project.py", line 323, in <module>
    replace=args.replace_campaign)
  File "/uboone/app/users/vito/project.py/converter/poms/poms_client/python/poms_client.py", line 131, in upload_wf
```

```
replace=replace
File "/uboone/app/users/vito/project.py/converter/poms/poms_client/python/poms_client.py", line 735, in make_poms_call
    raise RuntimeError("POMS call %s error: HTTP status: %d\n%s" % (method, status_code, res))
RuntimeError: POMS call ini_to_campaign error: HTTP status: 401
```

**#5 - 08/05/2019 12:00 PM - Marc Mengel**

Hm.. so I can add an (empty) campaign with production role, but not with analysis... I'll look at that. I'm not sure why..

The second one is a pretty clear bug; it's trying to make sure you have permissions on the old campaign, but there isn't one...

**#6 - 08/08/2019 11:10 AM - Yuyi Guo**

- Assignee set to Marc Mengel

**#7 - 08/20/2019 01:53 PM - Vito Di Benedetto**

This is fixed now.

I'm able to create POMS Campaign on dev instance using poms\_client and also using POMS portal.

**#8 - 12/22/2020 02:19 PM - Marc Mengel**

- Target version set to v4\_3\_0
