Production Operations Management Service (POMS) - Bug #23097

Analysis user able to modify production

08/12/2019 09:22 AM - Stephen White

Status:	Resolved		**Start date:**	08/12/2019
Priority:	Normal		**Due date:**	
Assignee:	Marc Mengel		**% Done:**	100%
Category:			**Estimated time:**	0.00 hour
Target version:	v4_2_0		**Spent time:**	0.00 hour
First Occurred:			**Experiment:**	-
Scope:	Internal		**Stakeholders:**	

Description

If an analysis user is also a production user in another experiment like this:

```
pomsdev=> select * from experiments_experimenters where experimenter_id=5;
   experiment | experimenter_id | active |    role
  ------------+-----------------+--------+-----------
   samdev     |               5 | t      | production
      dune    |               5 | t      | analysis
```

POMS will show analysis on the web form drop down But   The database has session_role marked as production.   Meaning: they have full edit access to production campaigns through the GUI - and probably other production privs too.

Several Permissions fixes...

[d0791795](#)
[73f25b5e](#)
[70772d4a](#)
[70772d4a](#)

I think its okay now. Also showing the right ones as authorized or not on the show_campaigns page...
