fife_utils - Feature #23274

in fife_wrap check metadata existence before filtering it

Description

It would be useful in fife_wrap to add a check on the metadata to be filter.
This will avoid a crash in case we try to filter metadata that are not present in the json produced by sam_metadata_dumper.

Currently if in the fife_launch cfg file we have

```
filter_metadata_2 = art.run_type
```

and that metadata is not present in the file, fife_warp has the following crash:

```
Traceback (most recent call last):
  File "./fife_wrap", line 1950, in
    w.copy_back()
  File "./fife_wrap", line 1473, in copy_back
    res = self.copy_back_n(i)
  File "./fife_wrap", line 1549, in copy_back_n
    metadata_d = self.do_metadata(f)
  File "./fife_wrap", line 1377, in do_metadata
    del metadata_d[ff]
KeyError: 'art.run_type'
```
