Description

We want to be able to source various setup scripts, or load the configurations they hold.

For instance SBNDAQ uses /sbndaq/srcs/sbndaq/dab/DAQInterface/setup_daqinterface.sh

Related to this issue there is [#23699](#) on SBNDAQ.

- Status changed from New to Rejected

After some investigation into this I believe for now this is something not yet necessary as there's still quite a lot of development on the day project.

Will not enable this feature for now.

Rejected.
