Target version:			
Description			
Initializing a display (e.g., after booting) Often, the Java-Selenium-Firefox connection does not get initialized properly. The Java program has been trained to recognize this			
<ul style="list-style-type: none">• Restart Java : solves it about 5% of the time• So, 75% of the time, a display comes up within 27 iterations.• One iteration is about 30 seconds.			
But this needs to be better.
