

Production Operations Management Service (POMS) - Bug #24385

Add LaunchFailed style checker to also look for things not updated by Landscape...

05/07/2020 01:18 PM - Marc Mengel

Status:	New	Start date:	05/07/2020

Scope:	Internal	Stakeholders:	

Description

So if Landscape goes down, at the moment POMS goes blind; and jobs that complete while we don't have Landscape info just stay Running or Idle (or New) forever...

We should run some sort of check periodically for things that aren't completed but haven't been updated in some time and maybe check on them with condor_q or what have you...
