Target version:	v3_6_4	Spent time:	0.00 hour
Stakeholders:			

Description

This year Fermilab interns are all remote.

For people with limited computing and Python experience, there will be some introductory material and live support via slack.

Support activities will include:

- review and improve the web pages, presentations and Jupyter notebooks at <https://sites.google.com/view/targetpython/>
- check in at least on a daily basis to the summer-interns channel in the fermicoding Slack.
 - the main goal is to support people working on the material on the website (lessons, notebooks, ...)
