

GlideinWMS - Feature #24548

Drop GIExec support

06/19/2020 10:20 AM - Marco Mambelli

Status:	Feedback	Start date:	06/19/2020
Priority:	Normal	Due date:	
Assignee:	Marco Mascheroni	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	v3_7_2	Spent time:	0.00 hour
Stakeholders:	OSG		
Description			
Drop support for GIExec			
Announced at the stakeholders' meeting.			
There are only a couple of sites using this in Europe and they are phasing out (check w/ Steve Tim)			
Tim Thaysen mentioned on 6/19 that the Flightworthy team would like to get rid of it.

Here from Tim Theisen

Hi Tim,
end of July works fine for GlideinWMS.
8.9 is used in the development version that will drop it in the next release due out soon.
GWMS 3.6.x stable uses OSG 3.5, condor 8.8.

Thank you,
Marco

Hi Marco,

We would remove it from the Development version. This will become the new stable. We had originally stated the HTCondor 9.0 would be out this summer. It's now looking like fall. So, if we remove it from 8.9. It would only be in the 8.8 version (not 9.0). HTCondor will support 8.8 for 6 months after the release of 9.0. So, glxexec would be in a supported version until next spring. The OSG may elected to continue the support for longer. We have done so in the past.

Does that make sense to you?

Would it be a hardship if glxexec is dropped from the 8.9 series at the end of July? (Otherwise, we could drop support for it at the end of September.)

Let me know what works for you.

...Tim

Green light for dropping GIExec

GIExec is no longer used in the FIFE factories, by DUNE or by the CMS factories and it is not installed anyplace at Fermilab anymore.

Steve

- Related to Feature #25249: Review the need for GLIDEIN_REQUIRE_VOMS, VomsIdle, ProxyIdle added

#5 - 11/25/2020 09:33 AM - Marco Mambelli

- Assignee changed from Dennis Box to Marco Mambelli
- Status changed from New to Work in progress

#6 - 11/25/2020 03:39 PM - Marco Mambelli

- Assignee changed from Marco Mambelli to Marco Mascheroni
- Status changed from Work in progress to Feedback

Some files have not been fixed:

install/glideinWMS.ini, install/services/VOFrontend.py, install/services/Factory.py, install/services/Condor.py, install/services/Glidein.py, doc/components/configuration_install.html, not touched, files being removed in another ticket [[#25053](#)] - were part of tarball installation

Changes are in v37/24548
