

Production Operations Management Service (POMS) - Bug #24549

samweb_lite layer should not try looking up project name "None"

06/19/2020 10:38 AM - Marc Mengel

Status:	Work in progress	Start date:	06/19/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Scope:	Internal	Stakeholders:	

Description

Currently in error log we have lots of:

1 2020-06-19 09:20:02,353 <10791.140018983065344> samweb_lite.log: Error: got no result for url
http://samweb.fnal.gov:8480/sam/uboone/api/projects/name/None/summary?format=json&process_limit=0

which means we're trying to look up a null project name, or possibly one named "None"...

History

#1 - 12/22/2020 02:19 PM - Marc Mengel

- Target version set to v4_3_0

#2 - 12/22/2020 03:08 PM - Marc Mengel

- Status changed from New to Work in progress

So it looks like this was happening in the fetch_info_list() method; where some of the submissions have a project of None... Having this instead look up a url of None if the s.project is None, and have the safe_get routine just return None if the url is None...
