Description

Currently there is a script (runpylint.sh) running pylint for python 2.6 and 2.7.

A new shell module, do_pylint.sh should be added, following the new runtest interface (see do_shellcheck.sh) and running python3 pylint on all the files (similar to what runpylint.sh is doing for python2).

The python version could be configurable but we are interested in python 3.6
