<b>Target version:</b>			
<b>Description</b>			
On behalf of Shekhar Mishra, Iceberg want to process data and needs a new release of dunetpc.			

#### History

##### #1 - 08/19/2020 10:10 AM - David Adams

Normally, Christoph prepares the releases and I build them but I think Christoph is away this week.

Should I build v08\_62\_00\_01 from the head of dunetpc?

##### #2 - 08/19/2020 10:13 AM - Christoph Alt

I was going to wait until larsoft v9 is released later this week for this week's dunetpc release, but the head of dunetpc develop already depends on larsoft v08\_62\_01, which was released on Monday. So you can tag dunetpc v08\_62\_01 from the current head of develop.

##### #3 - 08/19/2020 10:14 AM - Tingjun Yang

How soon do you need the release? It would be good to also merge Mike's changes to SCE calibration into a new release.

##### #4 - 08/19/2020 10:23 AM - David Adams

Thanks Christoph. I noticed the new dependency. I have started a test build of v08\_62\_01.

I would like to get this out before we move to larsoft 9. If the SC mods go in before that completes, I will start over with those. Otherwise, if the SC mods are needed before that larsoft, put in another request and I will build v08\_62\_01\_01.

##### #5 - 08/19/2020 11:15 AM - David Adams

- Status changed from New to Work in progress

Tag v08\_62\_01 is made and builds are started.

##### #6 - 08/19/2020 11:16 AM - David Adams

- Subject changed from Iceberg needs dunetpc release for production to Iceberg needs dunetpc release for production (v08\_62\_01)

Add tag to the title of this report.

##### #7 - 08/19/2020 01:28 PM - David Adams

The mac builds failed because larsoft v08\_62\_01 is missing. I add Lynn and Kyle who may be able to tell us if the larsoft release is planned for mac.

##### #8 - 08/19/2020 01:28 PM - David Adams

Th slf builds are installed.

##### #9 - 08/19/2020 04:35 PM - Lynn Garren

Ah sorry. Yes, larsoft v08\_62\_01 is available for macOS, and properly installed on cvmf. However, it was not installed in /grid/fermiapp/products/larsoft. That is now done.

##### #10 - 08/21/2020 10:42 AM - David Adams

- Status changed from Work in progress to Closed

Mac builds are also installed. This completes the task.
