

NOvA-ART - Bug #24873

setup_final_security and prod proxy funk

08/27/2020 02:05 PM - Gavin Davies

Status:	New	Start date:	08/27/2020
Priority:	Low	Due date:	08/27/2020
Assignee:	Gavin Davies	% Done:	0%
Category:		Estimated time:	0.50 hour
Target version:			
Description			
As reported by Connor J.:			
<pre>-bash-4.1\$ setup_final_security -f Forcing regeneration of proxy by removing existing one from X509_USER_PROXY= X509_USER_PROXY is not set, so remove from default location /opt/novapro/novapro.Production.proxy rm /opt/novapro/novapro.Production.proxy rm: cannot remove `/opt/novapro/novapro.Production.proxy': Permission denied Checking if /tmp/x509up_u53046 can be reused ... yes -bash-4.1\$</pre>			
It seems to be defaulting to trying to use Production credentials.
