### History

#### #1 - 09/14/2020 07:22 AM - David Adams

Test build is started.

#### #2 - 09/14/2020 08:35 AM - David Adams

Tag is made and builds are started on Jenkins.

Tom or Tingjun, could you update the Jenkins build matrix to drop all but py3 slf7? Sorry, I could never get anyone to give me instructions for that.

#### #3 - 09/14/2020 10:53 AM - David Adams

- Status changed from New to Closed

Builds are installed: {slf7}, {e19, e19-py2, c7, c7-py2}.

#### #4 - 09/14/2020 10:58 AM - Tingjun Yang

Thanks David. Have we decided to drop the support for py2? If larsoft continues to make them, I think we can still build releases with py2 just in case some people may still need it.

#### #5 - 09/15/2020 04:40 AM - Christoph Alt

I think dropping the py2 builds is still under discussion. I removed the macOS and slf6 builds from the dune-release-build configuration in Jenkins for now.

#### #6 - 09/15/2020 10:48 AM - Thomas Junk

I polled the reco and computing listserv groups and didn't get any complaints. Lynn asked if we could drop py2, and I said okay with that. We may have to hold a hand or two if there are any py2 holdouts. The only (recent) mention of py2 in Slack has been new users following tutorials that mention releases with that qualifier.
