Description			
Hello,			
I am trying to use sam_move2archive_dataset, but I get this error message for e.g.:			
<pre>\$> sam_move2archive_dataset --name cnf.srsoleti.cosmic_s1_dsstops_corsika.20200914.fcl ... ifdh lss: popen failed; errno == 2 ERROR:root:exception in ifdh ls('/pnfs/mu2e/scratch/users/srsoleti/workflow/corsika_dsstop_s1_fcl_20200914/0c'): Traceback (most recent call last): File "/cvmfs/fermilab.opensciencegrid.org/products/common/prd/fife_utils/v3_3/NULL/lib/fife_sam_utils.py", line 229, in wrap_ls res = self.ifdh_handle.ls(path,n,force) File "/cvmfs/fermilab.opensciencegrid.org/products/common/prd/ifdhc/v2_4_5/Linux64bit-3-10-2-17/lib/python/ifdh.py", line 311, in ls def ls(self, *args): return _ifdh.ifdh_ls(self, *args)</pre>			
However, the files get copied correctly. My guess is that it's trying to open a directory thinking it's a file, so it gives this error, but I might be wrong.
