

artdaq Utilities - Bug #25206

DAQInterface does not handle init_fragment_count bookkeeping properly when multiple outputs use RootNetOutput

Description			
In Mu2e, we are noticing an issue with DAQInterface where bookkeeping does not properly set the init_fragment_count for an EventBuilder which sends art events to a subsystem and to a DataLogger.			
I have determined that the issue is related to not giving a starting location to enclosing_table_range.
