

TRACE - Feature #25591

custom debug labels and colors

03/04/2021 09:27 PM - Ron Rechenmacher

Status:	New	Start date:	03/04/2021
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>Currently, users are using #define LVL_MYLVL to define custom levels. It would be nice if define names (or enum names) would appear in the stdout or tshow output. And then it would be nice if those same labels could be used when turning on/off the associated lvls. Lastly, lower priority, maybe those levels/labels could have custom colors.</p>
