

GlideinWMS - Bug #2564

Found a Factory attr combination that does not work

Description	
Hi all.	
We just discovered that <attr name="VOS_USING_SE_VONAME_LOWERCASE" const="True" glidein_publish="True" job_publish="True" parameter="False" publish="True" type="string" value="CMS,GLOW"/> does not get propagated to the worker node!	
The reconfig puts it in \$WORK/attributes.cfg and \$STAGE/condor_vars.*.lst but nowhere else!	
I think this is a bug. Can you please fix it?
