

art - Feature #2629

ReaderSource should allow the detail class to decide whether fileNames[] is required, and cope accordingly.

Description

We have a use case for a ReaderSource detail object for which file names do not make sense as the raw event data is read from a queue system. It should be possible to prevent ReaderSource requiring a non-empty fileNames list for normal operation.

History

#1 - 08/02/2013 03:12 PM - Christopher Green

- Status changed from New to Resolved
- Target version set to 1.07.00
- % Done changed from 0 to 100
- Scope set to Internal
- SSI Package art added

This was implemented some time ago.

#2 - 08/09/2013 11:31 AM - Christopher Green

- Status changed from Resolved to Closed
