

NOvA DAQ Cluster - Far Det - Bug #2791

Far Detector Network and/or DAQ Nodes are screwed up

06/25/2012 10:59 AM - Peter Shanahan

Status:	Resolved	Start date:	06/25/2012
Priority:	Urgent	Due date:	
Assignee:	Andrew Norman	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Many FarDet nodes are not allowing log-ins, despite being pingable.			
E.g.,			
<pre>[novadaq@novadaq-far-master ~]\$ ping novadaq-far-farm-01.fnal.gov PING novadaq-far-farm-01.fnal.gov (198.124.68.30) 56(84) bytes of data. 64 bytes from novadaq-far-farm-01.fnal.gov (198.124.68.30): icmp_seq=1 ttl=64 time=0.099 ms 64 bytes from novadaq-far-farm-01.fnal.gov (198.124.68.30): icmp_seq=2 ttl=64 time=0.087 ms ^C --- novadaq-far-farm-01.fnal.gov ping statistics --- 2 packets transmitted, 2 received, 0% packet loss, time 1093ms rtt min/avg/max/mdev = 0.087/0.093/0.099/0.006 ms [novadaq@novadaq-far-master ~]\$ ssh !\$ ssh novadaq-far-farm-01.fnal.gov Permission denied (gssapi-keyex,gssapi-with-mic).</pre>			
Attempts to log into PDU via web interface using firefox launched on far-master fail. Attempts to reach any website from same fail.			
This is impeding commissioning of FarDet DAQ system.			

History

#1 - 06/25/2012 04:42 PM - Peter Shanahan

- Status changed from New to Resolved

Andrew ran script to re-mount disks on all nodes

#2 - 07/12/2012 04:25 PM - Andrew Norman

Network hosts bug with /etc/hosts file having an extra ctrl-M in it. Fixed.
