Description

The check mode in glidein_startup.sh is buggy.

Simply put, it does not work.

Needs to be fixed.

Fixed the basic problems;
not the glidein actually starts in test mode and the check finds it.

Still needs some polishing, but it is already usable.

I will merge this one back to v2plus and master, unless I hear objections.

I have reviewed the changes. They look fine to me. Please merge into v2plus. These changes should also probably be merged to master as well.

Merged into both v2plus and master.
