Target version:	Monitoring Systems		**Spent time:**	0.00 hour
component:	epics			

Description

Set up software products (already done?) and scripts. Set up the starting PostgresSQL database with the monitoring data tables. Exercise data handling and storage using the Glomation readout task (and others which may follow). Develop displays for hardware status and alarms. Eventually package the startup scripts as items which can be controlled via the Application Manager and/or desktop icons.

History

#1 - 08/29/2012 01:32 PM - Catherine James

- Subject changed from EPICs system to EPICs-CSS system

- Description updated
