

uBooNE DAQ - Feature #2937

SN Runs

08/28/2012 06:05 PM - Catherine James

Status:	Closed	Start date:	11/26/2012
Priority:	Normal	Due date:	01/25/2013
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Upper Level DAQ System	Spent time:	0.00 hour
component:	Event Building		

Description

Set up a Run Type, within the config mgr and/or run control, which when initiated gathers all of the SN or untriggered data stored on daq node local disk, builds it into time-slice records, and formats records into a Run File for storage. Study through-puts; system loads; total time required for this run type. The "true event" initiator for this Run Type will be a SNEWS email; we may set up a substitute initiator for periodic gathering of this untriggered data.
