Experiment:	Mu2e		

Description

Hello,

A useful feature of the framework is the ability to access fhicl configuration of a producer module used to make a product by querying the product handle. At present this functionality has some caveats, such as it does not work correctly when the input files are result of merging.

This request is to properly support the querying functionality, so that one can reliably get access to the configuration used to make a specific data product.

Andrei

History

#1 - 08/05/2013 03:25 PM - Christopher Green

- Due date set to 01/01/2014
- Category set to Metadata
- Status changed from New to Accepted
- Target version set to 2.01.00
- Scope set to Internal
- Experiment Mu2e added
- SSI Package art added

This requires the metadata revolution and should be naturally fixed as part of that revolution.

- Status changed from Accepted to Feedback

We need to understand what "work correctly" means to Mu2e, if this is an issue that is still of interest to Mu2e.

#3 - 11/03/2015 11:51 AM - Andrei Gaponenko

Marc, please close this issue. (I just learned that e-mail replies to redmine do not work.)
