

GlideinWMS - Feature #3104

Changing the order of config file lookup for glidecondor_addDN

11/02/2012 03:20 PM - Igor Sfiligoi

Status:	Closed	Start date:	11/02/2012
Priority:	Normal	Due date:

Target version:	v2_7	Spent time:	0.00 hour
Stakeholders:			
Description			
glidecondor_addDN when used in -daemon mode, currently first looks up for LOCAL_CONFIG, and only if that cannot be found, it will try the config.d files.			
I am proposing we change this logic; it should first try to put the changes into a dedicated config.d file, and only if that does not work, modify LOCAL_CONFIG.

Doug, can you have a look?

#2 - 11/21/2012 09:55 AM - Douglas Strain

- Assignee changed from Douglas Strain to Igor Sfiligoi

Please change 'condorExe.iexe_cmd("condor_config_val LOCAL_CONFIG_DIR")[0][:-1]' to use strip() instead. I think we've decided in a different ticket that was a better method.

Other than that, the fix looks fine to me. Feel free to merge after you have changed that.

#3 - 11/24/2012 12:23 AM - Igor Sfiligoi

I am trying to minimize the changes... just moving blocks of code around.

Will address the strip issue in [#3054](#).

Merged in v2plus and master.

#4 - 12/04/2012 03:05 PM - Parag Mhashilkar

- Target version set to v2_7_x

#5 - 12/04/2012 03:20 PM - Parag Mhashilkar

- Target version changed from v2_7_x to 293

#6 - 12/17/2012 11:44 AM - Parag Mhashilkar

- Status changed from Feedback to Resolved

#7 - 03/18/2013 01:20 PM - Parag Mhashilkar

- Target version changed from 293 to v2_7

#8 - 03/18/2013 01:56 PM - Parag Mhashilkar

- Status changed from Resolved to Closed
