

NIMI - Support #336

Documentation for monitoring tools

02/26/2010 01:31 PM - James Fromm

Status:	New	Start date:	02/26/2010
Priority:	Normal	Due date:	
Assignee:	Randy Reitz	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	v1_0_0	Spent time:	0.00 hour
Description			
<p>Need monitoring tools (Check APR collector, Check DHCPLEASE collector, etc...) to have documentation to allow for debugging. Basic setup of the software (i.e. cronjob out of nimi account), location of code, location of log files, how to restart, etc...). The monitoring tools should include this link in the email that is being sent out. There can still be a short description like: -- Please check the NIMI ARP Collector. When the most recent NIMI arp_table_intervals records are older than 1 hour, this usually means the ARP Collector is not working. See http://cdcvs4.fnal.gov/redmine/projects/nimi/our_new_document)</p>
