Description
There should be a way to export and (more importantly) import list of users into the system

Subject: Re: Requested Item RITM0055828 has been assigned to group Electronic Logbook Support

Hi Margherita,

Often, we one is starting up a new ECL, an admin will have a spreadsheet or something like that with contact information, etc. It is EXTREMELY tedious to have to enter this information for each user, one at a time. I think it would make sense to have a utility that could upload a CSV file (you can decide on the format) with this information and create accounts in bulk. Details can be worked out with us, but I strongly encourage such a utility to be developed.

Thanks,

Jon
