

Simulation Pipeline - Feature #3712

make API and data format robust to user error

04/17/2013 11:42 AM - Brian Nord

Target version:			
Description			
Currently, a user can overwrite data in the h5 file. Can we prevent this or create an option to prevent it?			

History

Has this been a problem in our development?

I'd like to solve this problem when we have it and not before. Because we don't have dozens of 'users' who overwrite the data in the hdf5 file at the moment and there will be cases when we have to overwrite some data where we would have to create a workaround.
