

## artdaq - Bug #3887

### artdaq cannot currently be cloned onto a Mac.

05/15/2013 05:20 PM - Christopher Green

<b>Status:</b>	Closed	<b>Start date:</b>	05/15/2013

<b>Experiment:</b>			
<b>Description</b>			
Due to an oversight, the artdaq/Applications/MPI2 directory has an eventbuilder.cc and an EventBuilder.cc. An attempt to clone this repository onto a Mac will result in one file overwriting the other. I would suggest either moving the execs and pmt.rb into a subdirectory exe/, or moving the library files into a support/ directory (my slight preference). Either would work.			

### History

#### #1 - 04/17/2014 09:29 AM - Kurt Biery

- Status changed from New to Resolved

This request was taken care of during the renaming of several classes in the Application/MPI2 directory in January 2014.

#### #2 - 04/17/2014 09:29 AM - Kurt Biery

- Status changed from Resolved to Closed

#### #3 - 05/23/2016 10:11 AM - Eric Flumerfelt

- Target version set to v1\_05\_09
