Description

Hi,

The id of a product pointed to by a ValidHandle object h can be accessed as h.provenance()->productID(). However the "shortcut" id() accessor is not defined, which makes it impossible to use a ValidHandle as an argument to art::Ptr(H const& hadle, key_type idx).

Please define ValidHandle::id() similar to Handle.

Andrei

History

#1 - 05/24/2013 02:28 PM - Marc Paterno

- Status changed from New to Assigned

This is a fine idea. There are a few other functions that are missing, and could be provided, in addition to id().

#2 - 05/24/2013 02:28 PM - Marc Paterno

- Status changed from Assigned to Closed

- % Done changed from 0 to 100

- Estimated time set to 1.00 h
