

## Fermi Redmine - Support #4012

### How to make sub-projects coherent?

<b>Description</b>			

#### History

##### #1 - 06/06/2013 10:15 AM - Lucas Taylor

I need to be able to tag issues by sub-project. The only way I saw to do this was create a set of sub projects under:  
<https://cdcvns.fnal.gov/redmine/projects/401-lhc-cms-detector-upgrades-project>

Q1) how can I make sure the various configuration settings are uniform for all sub-projects (e.g. issue categories, etc.)?

Q2) can I configure the issue submission form to our specific needs:  
<https://cdcvns.fnal.gov/redmine/projects/401-lhc-cms-detector-upgrades-project/issues/new>

For example under "Tracker" I'd like to have  
-- Resource change  
-- Schedule change  
etc.

I also need better workflow items on Status:  
-- Approved by L1 Manager  
-- Approved by L2 manager  
etc.

Thanks  
Lucas

##### #2 - 06/06/2013 10:17 AM - Lucas Taylor

Please ignore Q2 in this ticket -- it is a separate ticket ([#4013](#))

##### #3 - 06/06/2013 10:17 AM - Lucas Taylor

- Assignee set to Marc Mengel

##### #4 - 06/13/2013 04:56 AM - Lucas Taylor

- Assignee deleted (Marc Mengel)

Any news on this?

It is particularly annoying that the issue "Category" cannot be automatically the same for all projects.

This means that filters at the top level think a "Cost" issue for one sub-project is a different category from a "Cost" issue for another sub-project.
