<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
How can I configure the issue submission form to our specific needs:			
<a href="https://cdcv.s.fnal.gov/redmine/projects/401-lhc-cms-detector-upgrades-project/issues/new">https://cdcv.s.fnal.gov/redmine/projects/401-lhc-cms-detector-upgrades-project/issues/new</a>			
For example under "Tracker" I'd like to have			
-- Resource change			
-- Schedule change			
etc.			
I also need better workflow items on Status:			
-- Approved by L1 Manager			
-- Approved by L2 manager			
etc.			
In general, is there some documentation on what I can reconfigure and how to do it?			
Thanks			
Lucas
