<b>Description</b>			
If a user makes an entry to a specific elog with selected multiple categories and/or multiple people it would be nice if the following entries in that session came up with that same selected options as the default unless changed or the session ends.			
This will greatly facilitate entries for machine studies by groups of people.

- Priority changed from Normal to Low

Do you mean that you wish that after adding an entry with cataloging not equal to the current elog view/refinement that the view/refinement is set so that the entry is seen?

This is possible and did exist before but it would be hard to assure the entry will be seen (i.e. search text specified, date span not equal to the current date span, etc...)

Probably not going to happen this version, maybe the next.
