

GlideinWMS - Bug #4460

Re-architect the way we do logging in factory and frontend

07/31/2013 11:11 AM - Parag Mhashilkar

Target version:	v3_x	Spent time:	0.00 hour
First Occurred:	v3_1	Stakeholders:	
Occurs In:			

Description

Logging to entry logs from within the entrygroup with forking introduced in v3.1 is cause some serious issues with the log rotation. We have a bandaid solution in v3.1 but a better approach is to re architect the way log messages are written, for example have a logging service or use syslog or some other alternative that plays nicely with multiple asynchronous forks.

See [#4370](#) and [#4371](#) for details on the issues and temporary work arounds used.
