<b>Description</b>			
OnMon makes a ton of alert hitmaps that are meaningless most of the time (i.e. - they are just filled with "good" status all the time.) We should handle these in the same way that we handle the error plots - keep track of the All-Alert plot and only make the Alert-hitmaps when something begins to report a "bad" status.			

### History

#1 - 09/05/2013 12:57 PM - Michael Baird
