

GlideinWMS - Bug #4540

Frontend may not be accounting idle jobs submitted using vanilla proxies correctly

08/13/2013 03:00 PM - Parag Mhashilkar

Description

This seems to be a bug in glideFrontendElement.py

```
condorq_dict_types = {'Idle':{'dict':condorq_dict_idle, 'abs':glideinFrontendLib.countCondorQ(
condorq_dict_idle)},
                    'OldIdle':{'dict':condorq_dict_old_idle, 'abs':glideinFrontendLib.countC
ondorQ(condorq_dict_old_idle)},
                    'VomsIdle':{'dict':condorq_dict_voms, 'abs':glideinFrontendLib.countCond
orQ(condorq_dict_voms)},
                    'ProxyIdle':{'dict':condorq_dict_proxy, 'abs':glideinFrontendLib.countCon
dorQ(condorq_dict_voms)},
                    'Running':{'dict':condorq_dict_running, 'abs':glideinFrontendLib.countCo
ndorQ(condorq_dict_running)}}
```

Should be

```
                    'ProxyIdle':{'dict':condorq_dict_proxy, 'abs':glideinFrontendLib.countCon
dorQ(condorq_dict_proxy)},
```

Also logging in next few lines should log jobs with proxies correctly

```
logSupport.log.info("Jobs found total %i idle %i (old %i, voms %i) running %i" ...
```
