Description

Could you break up the External Beams e-log into a total of four different log "tags":

External Beamlines

Neutrino Muon

MTest

MCenter

This way we can differentiate between the different beamlines. Such as P1, P2 and P3 beamlines, TH, continental SY; Enc B, C, F manholes, G1, and G2 all belong in External Beams. Entries related to NM1, NM2, NM3, and the experiment is Neutrino Muon's Log. And the same for MTest and MCenter.

History

#1 - 08/22/2013 10:38 AM - Kyle Hazelwood

- Status changed from New to Resolved

Added the following categories:

- Numi
- MTA
- BNB
- Meson Test
- Meson Center
- Neutrino Muon

I will switch the existing NuMI logbook over to External Beamlines soon...

#2 - 08/28/2013 12:39 PM - Kyle Hazelwood

- Status changed from Resolved to Closed

NuMI logbook entries are now External Beamline entries with a NuMI category.
