<b>Description</b>			
<p>It would be nice to have the ability to hide entries from one or more logs without having to select all of the other logs. In the current view, a log can be selected or not selected. If no logs are selected, all of the logs are viewed. Hiding a log should NOT cause all of the other logs to be selected. This causes a headache when entries are being made.</p> <p>Think about it, Kyle.</p>
