Description

What we really want is to stage via some SRM if we are running at particular sites.

So we're adding a more complicated syntax:

```
IFDH_STAGE_VIA="*.fnal.gov->srm://some-place;;*.wisc.edu->srm://some-other-place;;..."
```

Listing just a plain, unconditional SRM location also still works.

This is done in the ifdhc code, but the copyback script still needs to support it.

History

#1 - 01/10/2014 02:06 PM - Marc Mengel

- Description updated

- % Done changed from 80 to 100

Updated the ifdh_copyback script to also parse the wildcard=>value;;wildcard=>value syntax.

#2 - 12/01/2014 10:57 AM - Marc Mengel

- Status changed from Assigned to Resolved

#3 - 12/01/2014 10:58 AM - Marc Mengel

- Status changed from Resolved to Closed
